SUMMARY

Product design student with a strong focus on AI-native product systems and workflow-based SaaS design. Interested in building scalable digital products that solve real operational problems using AI, automation, and clean UX architecture.

EDUCATION

Lagos State University (LASU)

B.Eng. Electronics and Computer Engineering

2027 (Expected)

PROJECTS

OpsFlow AI — AI Operations Workspace (Flagship Project) | AI-powered SaaS concept designed to manage team workflows, tasks, and productivity in one system.

- Task management system (create, assign, track)
- AI assistant for summaries and insights
- Workflow builder (visual automation system)
- Analytics dashboard (productivity insights)
- Notifications system (real-time UX concept)
- Focus: SaaS UX structure
- Focus: AI-native interaction design
- Focus: workflow-based product systems
- Focus: dashboard-heavy interface design

Campus Commerce System (Concept Project) | A campus-focused delivery and marketplace system designed for student logistics and vendor interactions.

- vendor product management
- student ordering flow
- campus-based location system
- admin-controlled vendor structure
- lightweight delivery workflow design
- Focus: real-world operational UX
- Focus: marketplace system thinking
- Focus: structured user flows

AI Workflow Builder (Concept Prototype) | A lightweight automation system design showing how users can build workflows using triggers, actions, and AI steps.

- Focus: visual workflow UX design
- Focus: automation logic representation
- Focus: AI-assisted process design

TECHNICAL SKILLS

UI/UX Design (SaaS Interfaces, Dashboards)

Information Architecture

Workflow Design Systems

Interaction Design

Product Thinking

Figma
Lovable
AI Design Tools
Notion (Product Planning)
Basic Prototyping Tools
AI workflow integration concepts
API-aware product thinking (lightweight)
Supabase (basic understanding)
No-code / low-code product building mindset

STRONG UNDERSTANDING OF

SaaS product structure and dashboards AI-assisted workflows and automation UX System-based UI design thinking
Rapid prototyping using modern tools

INTERESTS

AI Product Design Startup MVP Systems SaaS Architecture Workflow Automation Human-centered AI UX

OBJECTIVE

To work as a Product Designer in teams building AI-native or SaaS products, focusing on scalable UX systems, workflow design, and intelligent product experiences.

NOTE

This CV reflects hands-on product design thinking, conceptual system design work, and AI-assisted product prototyping capability.
